MEMORANDUM

Re: Luken "Tar" Level Inquiry

Attached are drafts of the revised chart, with explanatory notes, and cover letter that we propose to submit to Congressman Luken -- today, if at all possible. On reflection, and in light of concerns some of you have voiced, we propose not to include figures for duty-free sales on the chart. Such figures would not be responsive, and could create confusion.

Please review the figures for your company's products and the explanatory notes that accompany them. Please confirm that the figures given are FTC test method figures; that particular products are correctly identified as manufactured by unaffiliated licensees; and that the parent of an affiliated licensee (e.g., Philip Morris International) is correctly identified.
